eyebizz Conference

Optics Conference 2024

Knowledge platform

15 & 16 June Mannheim

Topics 2024:

Eye health and myopia management

Optics Conference 15 & 16 June Mannheim

At its premiere as a neutral information platform for ophthalmic optics, the Optics Conference by eyebizz in Mannheim on 9 and 10 June 2023 made a statement: the focus on myopia management was the appropriate topic for experts and those interested in this new service in ophthalmic optics.

The new format over one and a half days with a mix of workshops, exhibition and conference program was very well received. In the exhibition and workshops, the industry presented its products and solutions for myopia management. The lectures on Saturday offered the latest scientific findings, verifiable figures from current studies, experience reports and lots of valuable practical tips on how to responsibly integrate this relatively new service into the business.

The Optics Conference provided a comprehensive view of myopia management: editorial, critical, informative, stimulating, service- and business-oriented. And entertaining, too, as networking during the breaks and get-togethers in the evening were all about having fun..

The next step

When it comes to myopia management, „everything is in flux“ and so the topic will also play an important role at **the new edition of the Optics Conference on 15 and 16 June 2024**. The expansion of the program to include **eye health and its prevention** also underpins what myopia management has already shown: Responsible and sustainable preventive care for the customer is only possible in a network.

KNOWLEDGE ON AIR

We get the industry in front of
the microphone and the camera

Live and unvarnished Webinars 2024

In 2024, eyebizz not only wants to provide discussions, entertainment, and direct information at and with the Optics Conference. We will also increasingly use other formats and channels: for example, in **live webinars with experts from the industry**. We will discuss current developments, new products and offers, but also well-known opportunities and risks for opticians.

In 2024, we will bring the experts, the top management, the industry and the decision-makers with their employees from the companies, in short: the entire industry in front of the microphone, the camera and on paper.

We have a lot planned and are heading for new shores with the right technology.
